Name of Owner: Brenda Carroll Business Name: _____

Address: 3317 Corning Road Directions: _____

City: Plattsmouth State: Ne. Phone: () Cell: ()

Information Received: Dr. Hughes received a phone call regarding the Brenda Carroll facility. Caller indicated that there are so many dogs, that there is a question about proper care.

Follow-Up Action Taken: On 8-29-18, I did visit with Brenda Carroll, regarding the complaint received. At this time Brenda, has a total of 36 adult dogs, and around 45 pups, most of the pups, are 6-9 months old. Numerous non compliant items were found. 1. Facility is routinely non compliant, with program standards, sanitation issue's continue, along with other non compliant items. 2. More employee's are needed to properly care for the dogs, or major downsizing of numbers is needed to get facility in total compliance. 3. All dog pens located inside of facility need to be cleaned, piles of feces, need to be removed. Dogs are walking on feces, causing it to "pack" down to surface. 4. South outdoor pens, dogs cannot escape mud, or standing water, along with 2-3 pens located inside of barn have mud or wet surfaces. 5. Dog need to be kept in a clean dry enviroment, with clean, dry bedding. 6. Inside, and around outdoor pens, grasses, and weeds need to be cut, or mowed. 7. Outdoor pens located in north outdoor facility, need proper shade to protect dogs from summer heat. 8. One dog located in north outdoor area, did not have proper shelter, dog house was present inside of pen, however, inside of dog house was full of water, dogs need to have access to shelter at all times. 9. Fill in all dirt holes. Dowsizing options were discussed with Brenda Carroll, however Brenda, indicated that she needs time to think things over. To be in compliance by 9-5-18

Re-Inspection Notes 9/5/2018

I accompanied Inspector Rick Herchenbach on this re-inspection.

At this time, most of the dogs had been moved into roomy pens in the former horse barn. All had bedding and appeared comfortable.

The dogs still in the outside pens had wood chips spread in the pens to alleviate the muddy conditions and had tarps extended over the pen tops to provide shade. Mrs. Carroll indicated that they had received nearly 10 inches of rain the preceding weekend, and no outside dogs were without dry areas.

One of the younger dogs moved indoors was reported to be a determined fence climber. At the time of the inspection he had a slight rear leg limp, which was surmised to be from jumping down from his fence climbing activities. The inspection report required this dog to be examined by a Veterinarian.

The other non-compliant item was a bitch with a litter of pups in in an enclosure with another adult dog. The dogs appeared peaceable, however Mrs. Carroll was informed that having an adult dog (other than the mother) in with a litter of pups was a violation. She promptly started preparing a separate pen for the other dog.

Mrs. Carroll recognized that she needed to downsize to properly care for the dogs and submitted a list of about 54 dogs that were to be released to an out of state rescue organization within about 2 weeks. With the release of these dogs, she will be down to about 20 dogs. In the interim, Mrs. Carroll is enlisting the help of a friend to help care for the dogs.
